CALL FOR PAPERS
SPECIAL SESSION

Stochastic Calculus and Applications
Professor Mounir Zili

Department of Mathematics, Faculty of sciences of Monastir, University of Monastir, Tunisia

Aim: Stochastic calculus is a branch of mathematics that operates on stochastic processes. It focuses on analyzing and presenting solutions for a wide range of stochastic problems in engineering, hydrology, geology, biology, physics , economy and finance.

The aim of this session is to bring together researchers and students from all over the world to exchange and share their experiences and research results about all aspects of Stochastic Calculus, and discuss the practical challenges encountered and the solutions adopted.

Topics: Stochastic processes (Numerical , statistical and theoretical studies)

Stochastic differential equations (Numerical , statistical and theoretical studies)

Modelling and applications

Review Process: The Organizing Committee will send each paper to 3 independent reviewers, experts in the topic of the paper. So, each paper will be evaluated by three independent experts according to the following Criteria :

Relevance to the special session Call, Scientific - Technical Originality, Potential Impact and Interest for the audience, Scientific Content, Quality of the Presentation, Clarity of the Content, Comments For The Authors,
